

# VACCINES YOUR DOG SHOULD HAVE ONCE A YEAR

- **Rabies Vaccine**
- **DA2+CPV+CV/VANGUARD 5**-Vaccination that protects against Canine Distemper, Adenovirus Type 2, Puppy Parainfluenza, Parvovirus, and Coronavirus.
- **CPVVB-Bordatella Vaccine**- Protects against Kennel Cough and upper respiratory infections.
- **Fecal exam and de-worming if necessary**
- **Heartworm Test- (Blood test)**- for all dogs six months or older

**\*Dogs should be on heartworm preventative spring through fall, if not year round.**

**\*Highly recommended:** Microchipping- for easy identification
